PROFESSIONAL SUMMARY

Senior full-stack engineer with 10+ years of expertise in modern web development. Builds accessible, user-friendly interfaces and works well inside remote teams. Delivered production software for sites with millions of monthly active users, and ramped fast on unfamiliar stacks. Accessibility advocate and trainer to hundreds of software engineers. Frequent open source contributor.

CORE COMPETENCIES

React & TypeScript | Node.js & Express | Ruby on Rails | Testing & CI Discipline | WCAG 2.1/2.2 AA Accessibility | AI-Assisted Engineering | Remote Delivery, Async First | Design Systems & Storybook | Open Source Contribution

WORK EXPERIENCE

Habitual Genesis

Jan 2016 - Present

Principal Engineer & Technical Consultant | Remote

- Partner with authors, museums, and education nonprofits to ship low-maintenance digital products remotely.
- Talk to clients directly to find what matters most, ship the smallest useful version, and leave them a site they can update without a developer.
- Grow a nonprofit's mailing list through a pro bono site rebuild with a Mailchimp signup flow.
- Rebuild an author's book site to be mobile-first and maintainable without ongoing developer support.
- Research web platform options for the Mexic-Arte Museum and present the recommendation its board adopted.
- Contributes pull requests to widely used open source and civic tech projects in TypeScript, Python, Ruby and Go.

Technologies: JavaScript, TypeScript, HTML5, CSS3, GitHub Pages, Squarespace, Mailchimp, GitHub Actions

Numeral Studio

Feb 2025 - Jun 2026

Senior Software Engineer | Remote (Wellington, NZ)

- Delivered reusable React/TypeScript components inside Electron with accessible, responsive UI patterns plus Jest/React Testing Library coverage, so compliance reports went in without manual errors.
- Built React/TypeScript interfaces and Prisma-backed Node/Express services for secure HR case workflows, adding dynamic staff routing, hardened permissions, and automated ESLint/Prettier and unit-test checks.
- Supported the launch of The Design Conference 2025 and 2026 site on Next.js/TypeScript with Sanity CMS and Storybook, extending the design system to cut code duplication by 40% and keep the experience polished.
- Built a mobile-first interactive marketing demo for a Fortune 500 progressive web app, handling localised feature work with remote teams and tuning performance for fast global launches.

Technologies: React, TypeScript, Electron, Next.js, Node.js/Express, Prisma, Sanity CMS, Storybook, Cypress, Jest, GitHub Actions

PartsTrader Markets Ltd

Nov 2024 - Feb 2025

Software Engineer, Contract | Wellington, NZ

- Developed a dedicated .NET microservice to interface with a legacy API and built a modern, responsive front-end using React with TypeScript.
- Translated Figma UI designs into dynamic, accessible interfaces using React, TypeScript, and styled-components.
- Applied Domain-Driven Design across Repository, Domain Model, Mapper and Application Service layers, and used AI-assisted engineering tooling on nearly every pull request shipped.

Technologies: .NET, React, TypeScript, styled-components, Cypress, GitHub Actions

WorkTango

Jun 2019 - May 2020

Senior Software Engineer | Remote (Austin, TX)

- Re-architected the Rewards platform from Rails to ReactJS, resulting in a 15% increase in customer engagement and a 20% reduction in page load times.
- Implemented a modular design system to improve UI consistency and boost developer velocity across a fully remote team.
- Integrated features across the Performance Management and Rewards platforms, overhauling the product suite.

Technologies: ReactJS, Storybook, NodeJS, Jest, TypeScript, Ruby on Rails, GraphQL, PostgreSQL, CircleCI, SCSS, Figma

Conde Nast

Sep 2017 - Jun 2019

Software Engineer | Austin, TX (Hybrid)

- Built a brand-agnostic paywall architecture and component suite across 26 media brands, driving over 100% year-over-year growth in monthly subscriptions at Vanity Fair and Wired.
- Wrote the End-to-End Testing Condé Nast Paywalls post for the company tech blog: https://web.archive.org/web/2021/https://technology.condenast.com/story/end-to-end-testing-conde-nast-paywalls

Technologies: ReactJS, NodeJS, Jest, Puppeteer, TypeScript, SASS, Jenkins, CI/CD

Technical Training

Aug 2016 - Nov 2023 (non-contiguous)

Software Engineer & Technical Trainer | Various

- Delivered remote and asynchronous technical training to a diverse group of engineers, and mentored junior engineers through their first roles.
- Developed and presented training covering JavaScript, HTML/CSS, ReactJS, Python, Flask, PostgreSQL, Object-Oriented Programming, CI/CD, Agile, APIs, and Web Accessibility.
- Led a working group promoting inclusive web design and web accessibility practices, and facilitated technical workshops in an Agile environment.
- Built an internal tool for engineers, tripling stakeholder services' capacity.

Technologies: JavaScript, HTML/CSS, ReactJS, Python, Flask, PostgreSQL, CI/CD

PROJECTS

Price to Impact Open Source

Chrome extension that nudges high-impact-charity donations while shopping, shipped solo in a weekend with 62 tests.

TypeScript, Bun, Vitest

React Performance Checklist Open Source

Public teaching resource for new developers and coding agents: 34 rules held as structured data, a plain-language glossary, worked examples, and an MCP server so an agent can list rules, fetch one, and produce audit or fix plans.

React, MCP server

PR Vetting Open Source

Dependency-free Python CLI and GitHub Action that tiers pull request authors from public GitHub signals, so unknown or bot accounts cannot merge without a human decision.

Python, GitHub Actions

EDUCATION

Postgraduate Diploma, Information Technology Whitireia Community Polytechnic — 2024 - 2025

Full-Stack Web Development Dev Bootcamp — 2014

B.S. International Business & Entrepreneurship Chapman University — 2007 - 2011

SKILLS

Front-end & UI: JavaScript, TypeScript, React, Next.js, Electron, Storybook, CSS/SCSS, design systems, localisation, WCAG 2.1/2.2 AA, axe
Back-end & Data: Node.js/Express, Ruby on Rails, Python, Flask, .NET, GraphQL, REST/JSON:API, PostgreSQL, Prisma/ActiveRecord, Domain-Driven Design
Testing & Delivery: Jest, React Testing Library, Cypress, Puppeteer, GitHub Actions, CircleCI, Jenkins, Docker, AWS, ESLint/Prettier gates
AI-Assisted Development: Daily drivers: Codex CLI and open-weight models run locally through Ollama (DeepSeek, Qwen), hosted models when a task needs them; Claude Code for production work at Numeral Studio; MCP tooling and spec-driven workflows
